

# Omega 365 Release Notes

UID	Feature/Module	Description
WFL-188098	Activities	Activity, Handover tab -> Workflows > Added new column "Related Systems" in dialog for searching for workflows
WFL-185791	Authentication	NT Login screen design changes
WFL-102825	BIM & Digital Twin	Can now revive archived revisions
WFL-171084	BIM & Digital Twin	Can now archive approved/cancelled revisions
WFL-182525	BIM & Digital Twin	App for contractors to verify/review IFC files
WFL-187705	BIM & Digital Twin	A fix for loading speed was already implemented in last release.
WFL-185593	BIM & Digital Twin	Supporting selecting many more BIM Objects in Activities and Objects plugins.
WFL-186127	BIM & Digital Twin	Installation Status field is now added to objects grid in the BIM viewer
WFL-186129	BIM & Digital Twin	Repeat Frequency, Actual Progress, Planned Progress, WBS, Cost, Earned Value, Earned Hours and Est Hours are now in the BIM Activity grid.
WFL-187197	Complete	Components: Possibility to close a component type. This will exclude the component from the dropdown list.
WFL-189459	Complete	Completion: HOT4/HOT5 is now added as new settings for handovertypes. Added next to HOT1-3 in various applications.
WFL-188197	Complete	Scope Item Status By System Report: Added Activity Type column.
WFL-187537	Complete	Object listing in activity apps and scope explorer is now only using line-through if the object is deleted (removed red color).
WFL-187538	Complete	Activities: Fixed issue in target objects, giving the incorrect link when having multiple objects
WFL-187539	Complete	Scope Explorer: Settings to show HOT status and Color Codes now does not trigger refresh of the tree once clicked and the current selection is preserved. To update the current node with new settings, collapse the parent node and expand it again to load with new settings.
WFL-187989	Contract Management	Added new tooltip that displays if "Additional persons with access" are missing workspace-access.
WFL-185195	Contract Management	Added possibility to close element that requires formal response from other party if a formal response with status "Waived" has been sent.

# Omega 365 Release Notes

UID	Feature/Module	Description
WFL-183086	Contract Management	Column layout for cost breakdown inside a contract element has been changed to display: Description, Currency, Quantity, Unit, Rate, CurrencyAmountExclVAT.
WFL-160801	Contract Management	Linking mot dokumenter fra grensesnitt vil henvise til siste revisjon.
WFL-169961	Contract Management	Added possibility to move files to another stage in a bid.
WFL-159405	Contract Management	Added possibility to set "Enforce All Approval Steps" for a contract form. When activating this you will be able to set amount ranges on the verification steps (step+role+amounts). Combined with the authorization matrix (person+orgunit+amounts) it will forward the approvals to the responsible persons. All steps with a lower amount than the form cost will be involved when approving.
WFL-173370	Core Backend Technology	added support for changing bind to DesktopLookup
WFL-175928	Core Backend Technology	Enable \$t function for translations in both script tags and template tags on NT
WFL-184779	Core Backend Technology	quality-diagrams app converted to NT
WFL-184909	Core Backend Technology	systempermissions app created on NT
WFL-188007	Core Backend Technology	Added data reload on context change
WFL-188092	Core Frontend Technology	Data grid columns will be separated with col-id attribute. Grid itself will assign col-id. In cases when we want to sort and show different columns and same column are used in headers then col-id should be added to columns that we want to distinguish. Multiselect column will be saved in layout correctly. Changed documents, objects and workflow register articles accordingly.
WFL-188570	Core Frontend Technology	NT Procedure. Alias state was added for stateStorage in order to be same as Data Object.
WFL-184999	Core Frontend Technology	Data grid multiselect indicator will be updated after deleting rows and it will refresh selected items after each refresh, so getSelectedRows function will work properly.
WFL-186047	Core Frontend Technology	Data grid: fixed multiselect indicator.
WFL-188035	Cost Management	Added Payment Forecast and Periodic Payment Forecast in the cost curve grid view.
WFL-187716	Cost Management	Periodic Cost is now the default import type and further selection is saved to the browser. Current Cut Off data showing Forecast value. New column added (Periodic Actual) that is showing the Actual value for current period.

# Omega 365 Release Notes

UID	Feature/Module	Description
WFL-187082	Cost Management	It's now possible to navigate and see information for any WBS element (previously only was possible for lowest WBS level - Work Package). Also added ability to handle active selected tab in url and a link to "Import Forecast Phasing" application in Actions menu in Time-phasing tab.
WFL-184976	Cost Management	Added Text1 and Text2 as optional fields in booked cost table.
WFL-168331	Cost Management	Added update template in WBS setup
WFL-160443	Cost Management	Added possibility of setting committed on a WBS by tagging estimates as commitments.
WFL-183992	Doc Control, Review, Distribution +	Added button "Generate Document Numbers" in document plan import. Will set document no if document no is not already set and row has now errors. (These document numbers are not guaranteed to be unique, actual documents created before transfer of document plan will not consider these document numbers when incrementing sequence number.)
WFL-188520	Home & General stuff	Custom Permissions Overview: Now handling removal of Plan Access correctly.
WFL-186568	Incident Management	<p>Incident: We now do not automatically inject the orgunits from "To be evaluated by" and "Registered By" into "Sharing" - since these automatically get access to the incident without being added to sharing.</p> <p>Now we only list them as read only items under the "Shared with" section.</p> <p>Removed default option for "Registered by Org.Unit" when creating a new incident.</p>
WFL-186847	Meetings	Meeting: MOM sent on email is now called MOM_<ID>.pdf to avoid any special chars and issues when opening the MOM from the hyperlink in the mail.
WFL-187536	Mobile Apps (Web)	Mobile workflow: Attachments per step has been fixed.
WFL-187113	Mobile Apps (Web)	Mobile activity: Fixed an issue with check items
WFL-183237	Mobile Apps (Web)	Mobile activity: You can now create a workflow per check item, and see the workflows for each check item
WFL-173347	Mobile Apps (Web)	Mobile incident: The orgunit lookup when creating a new incident has been fixed, and the orgunits you can select is now the same as on desktop
WFL-188650	Mobile Apps (Web)	Mobile activity: Fixed the register showing deleted activities
WFL-187104	O365 New Tech	Notification bell will open "Notifications" tab when "Unread" is empty.
WFL-168360	Omega 365 Core Technology Platf	datachangelog converted to NT with various user friendliness improvements

# Omega 365 Release Notes

UID	Feature/Module	Description
WFL-175310	Post-It View	Splitter now takes scaling into consideration
WFL-183176	Post-It View	When you hover over the name of Groupsort1 in the swimming lane a edit icon show. Click to open a dialog where a prompt can be added so you can change the name of the swimlane
WFL-187693	Post-It View	Added a min-height to journal container to prevent that dropdown sometimes was hidden
WFL-177670	Procurement / Bid Manager	Added milestones tab in procurement.
WFL-187950	Quality Management	Added scroll in 'follow-up-item' to show all details, regardless of screen size.
WFL-187360	Risk Management	Risk Register: Fixed issue with the UID column when resetting column layout
WFL-188336	Risk Management	Risk Register - MonteCarlo area: Added two decimal formatting to numbers in P-Values section.
WFL-182332	Risk Management	Org Unit Setup: Added main risk table as an option in the blocked content list to support blocking creation of risks in org units.
WFL-188597	Risk Management	Fixed issue in risk-report-estimate that occurred due to NULL value check
WFL-187853	Scope Explorer	Scope Explorer: Fixed issue with color coding when node shows as "blue" when it was supposed to be green. (Now excluding handover activities in the check)
WFL-183179	Shared Folders	Merge functionality for pdf files in Shared Documents is added. New option is in dropdown Commands. Converts doc, docx, ppt, pptx, xls, xlsx to pdf and merges those as well.
WFL-186582	Status Reporting	Implemented ability to send reminders to elements assigned persons as in status reports.
WFL-187345	Status Reporting	It is now more easier to include image and report tags within the presentation template. Tags can be specified simply in text input areas.
WFL-178988	Status Reporting	added new element for Status Dashboards showing bid register information. The element is possible to filter by Org Unit.
WFL-183705	Status Reporting	Aligned functionality of elements and charts in URL modal, both tabs are showing chart/element preview and allows adding parameters.
WFL-185470	Tooling, App Designer, DB-Manag	Appdesigner Export as SQL: Fixed to handle 5 digits article version
WFL-181940	Workflows	Implemented Document Codes to Workflow Process Configurable Fields

# Omega 365 Release Notes

UID	Feature/Module	Description
WFL-187647	Workflows	Workflow: Added ActivityItem_ID to aviw_Workflow_Items
WFL-188524	Workflows	When Mandatory is set, the visibility cannot be removed.
