

Omega 365 Release Notes

UID	Feature/Module	Description
WFL-184116	Activities	Handover status is now added to the handover certificate.
WFL-184304	Activities	Activity: Related Documents, now showing document ID in the related documents list if there are no doc.no defined for the document.
WFL-184729	Activities	Prevent modification of workflows connected to an handover after the activity has been signed.
WFL-186371	Activities	Activity Checklist Report: Added ContentURL from check item description to the report.
WFL-186594	Activities	Added link to taktplan from the planning tab, right beside taktwagon label
WFL-184228	Assets Objects	Objects Register / Objects Detail: New field "Discipline" is now added to objects.
WFL-184445	Assets Objects	In an activity checklist, when using property sets we now store values against the activity/object/property, and update objects property once updated. This way we will preserve the input value from when the activity was executed. We also indicate the current object property value for info.
WFL-185405	Assets Objects	Incident tab in Objects Details is now updated with more columns in grid. Column list: UniqueID, OrgUnit, Registered By OrgUnit, HarmTo/Type, Title, Reported, Evaluated, Category, Consequence/Impact, Consequence Description, Severity, Incident Updated, Incident Created.
WFL-160376	BIM & Digital Twin	Option added to open view profile in any revision
WFL-162730	BIM & Digital Twin	IFC Upload now shows correct amount of document profiles
WFL-181061	BIM & Digital Twin	Distinct filters added for relevant columns in the Objects grid
WFL-182957	BIM & Digital Twin	Improved the filtering of documents for the document import functionality in BIM Setup
WFL-183718	BIM & Digital Twin	Added objects explorer to objects plugin
WFL-183747	BIM & Digital Twin	Can now select all BIM Objects, through a button at the top, based on the grid and it's filters in Objects plugin.
WFL-183797	BIM & Digital Twin	Controls on touch devices now have momentum on most control types, allowing you to swipe around in 2D and 3D.
WFL-184076	BIM & Digital Twin	Status Field is now visible in the grid through choose columns for Workflows
WFL-184841	BIM & Digital Twin	When opening Documents viewer, the asset object is updated with latest selected object

Omega 365 Release Notes

UID	Feature/Module	Description
WFL-184842	BIM & Digital Twin	Changed label on Activity card from "Asset Objects" to "Objects" to save space and keep consistency across the solution
WFL-185349	BIM & Digital Twin	Selection persisted through plugins
WFL-185413	BIM & Digital Twin	Uses global context instead of model context for the object explorer tree
WFL-185551	BIM & Digital Twin	Model picker app for file approval
WFL-185795	BIM & Digital Twin	Added Description & Object Type fields in 'Relate to Object' dialog
WFL-185834	BIM & Digital Twin	Object highlighting when clicking on row item in Workflows and Activities
WFL-186093	BIM & Digital Twin	Find Object now uses single click to frame object to support IOS
WFL-186325	BIM & Digital Twin	Creating new Object relations handles larger amount of selected BIM Objects
WFL-183989	Complete	Disciplines setup is now also available under the "Complete" menu
WFL-184105	Complete	In the Activity Checklist app document links opens in the same window, making it easy for mobile devices to go back to the checklist.
WFL-184268	Complete	Control Plan: Added possibility to change sorting of the activities in the tree view. Default is Planned Start/Finish but with option to switch to sort by activity name.
WFL-184306	Complete	Scope Explorer setup fields is now sorted by sequence.
WFL-184639	Complete	"Systems" column added to the search for workflows dialog/grid in handover for an activity
WFL-184725	Complete	Handover Status in the tree/node list is now available in Project Explorer
WFL-185050	Complete	Activity-Skyline view from Activities register now does not show start/finish date inside the skyline, but bases itself on the data in the activities register.
WFL-185226	Complete	Added new series for Due Date in Punch Items S-Curve in Scope Explorer
WFL-185230	Complete	Installation Statuses: Added OrgUnit field to control record updates and added publish to orgunit concept.
WFL-173375	Contract Management	Added tooltip helper for the name in new contract dialog. Can be customized in translations app.

Omega 365 Release Notes

UID	Feature/Module	Description
WFL-183212	Contract Management	Will automatically select correct orgunit in new workflow when creating new workflow via an interface.
WFL-185196	Contract Management	When using grid menu Import from Excel for batch insert of Contracts. In column Parent Org Unit, user needs to specify Org Unit Name
WFL-186599	Contract Management	Field "Issued By" has been added to contract element register.
WFL-186611	Contract Management	Added column "Invoiced Qty / Forecast Qty" in BOQ register. Exclamation mark will be visible when Invoiced Qty exceeds 70% of Forecast Qty.
WFL-176683	Core Backend Technology	Added translation of sql exceptions to NT backend as in CT
WFL-177587	Core Backend Technology	case sensitivity added to stbl_O365_AppsFiles_UTrig
WFL-179486	Core Backend Technology	NT article version compare fixed to work with all apps. Version filter added to only show applied versions of files when comparing files.
WFL-184196	Core Backend Technology	NT: Added conversion from datetime to time for time sql fields
WFL-168519	Core Frontend Technology	NT Grid shared filters can be hidden if shared via OrgUnit and deleted if shared directly via person
WFL-180103	Core Frontend Technology	Implemented touch support for OSizerPanel component
WFL-180432	Core Frontend Technology	Fixed format options with 'time' type fields for OColumn and ODatePicker components
WFL-182156	Core Frontend Technology	The save dirty indicator icon in grid has been changed from pencil to checkmark
WFL-183095	Core Frontend Technology	Content editor: attribute data-paste-plain = "false" was added in order to allow copy with formatting.
WFL-183788	Core Frontend Technology	Filter validation. Date parser will allow blank values as valid dates
WFL-184313	Core Frontend Technology	Data grid: system columns as selection or action cell will not be draggable or resizable
WFL-184439	Core Frontend Technology	Date picker will set correct date, not day before.
WFL-185542	Core Frontend Technology	Added a new slot for ODataGrid 'detailTab' in cases where you have a single details tab and don't need to use iframes
WFL-148758	Cost Management	It is now possible to update time-phasing forecast progress data using both Periodic or Cumulative Input and update live forecast progress curves.

Omega 365 Release Notes

UID	Feature/Module	Description
WFL-164975	Cost Management	Added a new tab in WBS details app: Changes. Will display all changes for the current WBS. Added new column WBS in the Change Register.
WFL-182273	Cost Management	Added summary fields for Forecast phasing import application, ability to filter by WBS tree and see curve summary comparing updates to the Forecast data with live forecast before the import. It is also now possible to update time-phasing data using Periodic input.
WFL-185333	Cost Management	It is now possible to display WBS from other orgunits in the apps Project Assignments and Position. By default it will show WBS from the closest cost project.
WFL-186179	Cost Management	Updated trigger (atbl_Cost_Estimates_ITrig) so that WBS CutOffs will be added automatically when adding estimates so that you don't have to go into "WBS Cost & Progress".
WFL-182128	Doc Control, Review, Distribution +	Document: Link added in distribution group details dialog (opened by clicking a row in Distribution Groups grid), to allow for easy access to setup.
WFL-182909	Doc Control, Review, Distribution +	Enabled External Distribution Column in Document Register
WFL-183639	Doc Control, Review, Distribution +	OrgUnit Field is enabled for both New Document and New Correspondence templates lookup
WFL-184002	Doc Control, Review, Distribution +	Excel and pdf export is now working in Document Analysis Result
WFL-185449	Doc Control, Review, Distribution +	Document register: Added link to DFO Requirements under Common Tasks (will only show if user has access to this app)
WFL-183668	Document Management	added Created By, Updated By and Created, Updated columns to the grid. The columns are hidden by default and can be selected from Show Columns... grid menu
WFL-176963	Incident Management	Updated a few columns to include their new field names, added lookups for the updated fields
WFL-183124	Incident Management	Implemented state memory for filtering checkbox on incident register
WFL-184618	Incident Management	Implemented fulltext search in incident register
WFL-184700	Incident Management	A subscriber to an incident may now collaborate if the "admin" bitfield is checked.
WFL-181115	Meetings	Meeting: When generating MOM it is now possible to exclude the participant list from the report.
WFL-182484	Meetings	You can now add Incidents to Agendaltems
WFL-182633	Meetings	Optional title is added to decision actions in meeting agenda item

Omega 365 Release Notes

UID	Feature/Module	Description
WFL-182639	Meetings	<p>New table and UI has been added to meeting app. When a meeting is set as IsTemplate the UI will display Published To where the user can publish templates to OrgUnits.</p> <p>In the meeting register the templates lookup will be based on the OrgUnit you have selected.</p> <p>In the meeting app the lookup will default to the context (which will be the meetings OrgUnit) but user can change the context using the selector in the top right which would then list all templates they have access to</p>
WFL-183025	Meetings	<p>Email that MoM has been approved is now sent to a person who sent MOM.</p> <p>The approval page has been updated so that one can see all participants marked to as Shall Approve MOM with their comments and uses an iframe of the meeting to make it easier to see both comments and agenda items.</p>
WFL-183032	Meetings	<p>Toggle Show only meetings I am participant in is added in Meeting overview.</p>
WFL-184955	Meetings	<p>You can now bulk update meeting names</p>
WFL-184996	Meetings	<p>Added ClassificationCode field to MOM report header</p>
WFL-185843	Meetings	<p>Added check and adjustment to ensure that Meeting detail preview spans whole height of the sidepanel</p>
WFL-185926	Meetings	<p>Implemented support for translations on Meeting Types.</p>
WFL-186084	Meetings	<p>Reduced unnecessary reloading of agenda items when clicking 'Add' dropdown</p>
WFL-184254	Mobile Apps (Web)	<p>Updated the mobile activity register to look better and be easier to navigate at a glance</p>
WFL-184419	Mobile Apps (Web)	<p>The mobile activity details app has been updated with a new design</p>
WFL-186080	Mobile Apps (Web)	<p>Mobile Workflow: Removed the horizontal swiper from steps to instead just show them as cards vertically with normal scroll</p>
WFL-186106	Mobile Apps (Web)	<p>Mobile Workflow: Fixed filtering for AssignedToMe, ISubscribeTo, WorkflowCreatedByMe</p>
WFL-186114	Mobile Apps (Web)	<p>Mobile Workflow: Added a "View in BIM" button for both 3D and 2D views</p>
WFL-186213	Mobile Apps (Web)	<p>Mobile object: Fixed the "Create workflow" button</p>
WFL-186307	Mobile Apps (Web)	<p>Mobile Object: Changed the "Create workflow" button to be a dropdown that shows a list of promoted workflows for objects, as well as a generic "New workflow" option</p>

Omega 365 Release Notes

UID	Feature/Module	Description
WFL-179552	O365 New Tech	NT Grid Filter sharing added. Filters in grid can be shared with other users. Sharing via Orgunit can be done in or365setup app.
WFL-183316	O365 New Tech	Added 'contextmenu' slot for datagrid to replace the default menu items
WFL-183439	O365 New Tech	Appdesigner NT: changing view name will not remove fields and will indicate non existing ones.
WFL-184198	O365 New Tech	Updated and moved vue-datepicker and date-fns libraries to the automated pipeline
WFL-184216	O365 New Tech	Report viewer: fixed context lookup filter.
WFL-184418	O365 New Tech	The new records panel in NT has been changed to be more compact and is now open by default. The new records no longer need to be committed as they're saved the same way as records in the main grid area.
WFL-184456	O365 New Tech	Fixed treeify level number not updating through dropdown and implemented the middle click level chooser for the current level button
WFL-184457	O365 New Tech	Appdesigner NT: Master detail fields lookup will be reactive and will change according to selection.
WFL-186359	O365 New Tech	Adding row-container to the div wrapped around the OTabs fixed the scrolling
WFL-186383	O365 New Tech	Removed CSP header script-src: unsafe-inline from NT
WFL-162944	Org Structure, Roles & Access	Updated duplicate person dialog text for importing duplicate persons using templates
WFL-183420	Org Structure, Roles & Access	Disabled editing inputs for FirstName and LastName fields inside User app, also fix button typo.
WFL-184222	Org Structure, Roles & Access	New field in System Persons register for Pseudonymization Date. This will add the person to a queue that is processed every night which removes the persons personal info.
WFL-184673	Org Structure, Roles & Access	When setting an Access Request as implemented/removing implemented it now checks for the users capability "Implement Access" for the org.unit of the request.
WFL-185354	Org Structure, Roles & Access	Enabled Expiration Date clearing from system-person app
WFL-186267	Org Structure, Roles & Access	Access Requests: When setting an access request as implemented - capability code "Implement Access" for the selected org.unit has been required. Now we only check if the user has this capability on any orgunit in the solution.

Omega 365 Release Notes

UID	Feature/Module	Description
WFL-181591	Planner Gantt View	Getting a calendar into the plan from a template (System Calendars) is now done via the button "Get From Template button".
WFL-183806	Planner Gantt View	Now aggregating progress on custom group by in the PDF export.
WFL-183859	Planner Gantt View	Added Planned Progress as a column in the PDF export.
WFL-184058	Planner Gantt View	Possible to sort the custom groups by any chosen fields in the PDF export (in addition to sorting on detail level).
WFL-184082	Planner Gantt View	Actual progress aggregates based on plan weight (duration, cost, or est. hours) at custom group by level.
WFL-183180	Post-It View	Wrong date was used as the basis for calculating the PPU (prosent plan utført)
WFL-184320	Post-It View	When the start date of the activity came before the start date of the plan, the activity was added to the first column. This has now been corrected and the activity is added to the relevant column (based on end date)
WFL-184489	Post-It View	Added trim on input for field GroupSort1 to make sure that the postit will be placed in correct GroupSort1
WFL-184491	Post-It View	When the start date of the activity came before the start date of the plan, the activity was added to the first column. This has now been corrected and the activity is added to the relevant column (based on end date)
WFL-184990	Procurement / Bid Manager	Changed the print of published documents from procurer. Will group by the date and time (excl. seconds).
WFL-185193	Procurement / Bid Manager	The issue here was that we had checks for usertype=email. I have updated our notify-procedures in procurement so that we support Email, SAML2, Office 365. The templates were also checked for Type="Email", but this was only added for some of them. I removed the check completely and updated the templates accordingly in omega and hydro. Also removed duplicate templates in hydro.
WFL-174227	Resource Management	Added new field DisableRateChangePerAssignment. Setting this to true will restrict manual changes to the hourly rate of assignments with this category.
WFL-177663	Resource Management	Added batch update functionality to the FromDate and ToDate columns in Project Assignments register
WFL-183192	Risk Management	Fixed sorting in Risk and Mitigating Measures, by Title report.
WFL-183196	Risk Management	Null check added in razor code for "risk and cost impact", works fine now.

Omega 365 Release Notes

UID	Feature/Module	Description
WFL-184085	Risk Management	<p>Default sorting in risk register is now on the Last Assessment Modification (datetime) column.</p> <p>In addition; we've added a new method for displaying the risk detail app in the register that performs significantly better.</p>
WFL-185917	Risk Management	Added Uncertainty_ID to the dsCommentsPersonsLkp where clause to fix duplicate names showing up in the lookup
WFL-184311	Scope Explorer	Scope Items app: Possible to view activity detail app in sidebar
WFL-185965	Shared Folders	Shared Folder Notifications: Instead of link directly to the files we now send link to the shared folder document app to preview the file.
WFL-182548	Status Reporting	Implemented option to toggle between narrow & full width status dashboard container
WFL-183946	Status Reporting	It is now possible to merge URL content and input into status report. If URL content is used, user can provide additional input. In Status Report when "merge content" is clicked, URL content will be populated first, and if there is any text input available it will be populated below.
WFL-184529	Status Reporting	Added ability to choose whether user want to maintain pasted text formatting or not. This setting is remembered per user.
WFL-186500	Status Reporting	Now it is possible to copy URL address with selected active tab, which will allow to open the application and showing required tab content.
WFL-177130	Takt Plan View	Added scaling functionality for taktplan
WFL-185251	Takt Plan View	Added support for being able to set a time window for a specific period. It is based on week (added in system setup).
WFL-185202	Tooling, App Designer, DB-Manag	Sitesetup NT: Delete from database button will do delete and create remove script.
WFL-181790	Workflows	Added UID field for Activities lookup in Workflow > Relates to
WFL-181914	Workflows	Expand CWS if data exists on load
WFL-182244	Workflows	Update where clause for sub project lookup
WFL-182771	Workflows	New capability "Can modify issued workflows" has been added. It allows to update issued WF which has in workflow process SWFAI (Set workflow as issued when reaching this step. Will also lock basis-data for editing)
WFL-184312	Workflows	Updated Workflow Process Default Document to inherit its associated Item's Org Unit on workflow initiation

Omega 365 Release Notes

UID	Feature/Module	Description
WFL-184646	Workflows	Ensured issued date field visible when item is issued
WFL-184896	Workflows	Support for inline bimviewer in other apps implemented.
WFL-185292	Workflows	Tab title now matches the currently selected workflow item inside register detail pane
WFL-185817	Workflows	Fixed comment field not appearing on workflow item current step
WFL-186020	Workflows	Workflows: Added SubProject_ID as configurable field
WFL-176473	Workflows, Meetings and General	Updated all UID fields to sort by Created
WFL-183475	Workflows, Meetings and General	Current step Proposal/Decision is now retained and not overwritten when changing Workflow Process.
