| WFL-188272 | Doc Control, Review, Distribution + | Added check for Distribution Requirements   |
| WFL-187946 | Doc Control, Review, Distribution + | Preview of pdf should now work even if the filename contains & symbol   |
| WFL-188943 | Doc Control, Review, Distribution + | Fixed batch update of orgunit   |
| WFL-191444 | Doc Control, Review, Distribution + | Fixed issue with adding and removing related activities.  |
| WFL-181805 | Doc Control, Review, Distribution + | Added column "No verification" in document types. If set, verification on delivered revisions will not be initiated even though this has been set up for the orgunit. |
| WFL-181347 | Doc Control, Review, Distribution + | Duplicate error is now shown in error-column.<br>Added option to re-validate documents and grouped various action into one menu                                       |
| WFL-180359 | Home & General stuff                | Automatically add ExifData to file table on image upload if dataobject has ExifData column  |
| WFL-191374 | Mobile Apps (Web)                   | Taktplan tag on home screen now shows more than 25  |
| WFL-189470 | O365 New Tech                       | NT: Add exif data from image uploads to views with ExifData column  |
| WFL-189600 | O365 New Tech                       | NT Client side filtering: decimals will not get rounded to integer;   |
| WFL-188112 | O365 New Tech                       | NT Appdesigner preview: fixed preview tab not opening after it was closed. If it was closed before it will be reopened.   |

# Omega 365 Release Notes

| UID        | Feature/Module                | Description  |
|------------|-------------------------------|--|
| WFL-187858 | O365 New Tech                 | Small errors from system components will no longer crash the entire app but instead will be localized to that particular component   |
| WFL-191706 | Org Structure, Roles & Access | System OrgUnits: If clicking "Do not inherit" you get an extra confirmation box.   |
| WFL-190278 | Planner Gantt View            | We are now highlighting cut off conflicts by default.  |
| WFL-178323 | Planner Gantt View            | Added possibility to choose custom colors on activity details in PDF export. Also possible to set filters on those colors.   |
| WFL-185259 | Post-It View                  | Removed fields for start/end date to the plan. Start date is based in plan start date and end date is based on the max end data from activities  |
| WFL-191736 | Post-It View                  | Fixed that if you are changing the details of an activity, the information about the current activity is not removed if you release the mouse button outside of the detail display.                  |
| WFL-190483 | Post-It View                  | Green color on columns for not completed activities for future weeks   |
| WFL-190644 | Post-It View                  | Fixed that default shortcuts works   |
| WFL-188538 | Post-It View                  | Removed dates in where clause because relevant dates are now being returned from a stored procedure  |
| WFL-187952 | Quality Management            | Implemented functionality to associate individual meetings with specific lessons learned.  |
| WFL-190919 | Resource Management           | Renamed Position Status to Assignment Status in Resource module.   |
| WFL-158401 | Resource Management           | Possible to mark position as "Potential" to exclude it from FTE summaries.   |
| WFL-172869 | Resource Management           | We will now only create actions about assignment changes if a "Resource Admin" has been specified for the person involved.   |
| WFL-174428 | Risk Management               | <ol style="list-style-type: none"><li>1. Striketrough added for deleted risks</li><li>2. Added same red visual indication used for contract-elements with buttons for delete and undelete.</li></ol> |
| WFL-185596 | Risk Management               | Risks marked as deleted are no longer displayed in the nominated risks overview on the home page   |
| WFL-184980 | Risk Management               | Related Interfaces can now be related directly from the Risk detail app.   |
| WFL-190894 | Risk Management               | Riskregister: Name column is now editable again to facilitate adding new risks and changing the risk name using grid   |
| WFL-188642 | Risk Management               | Riskregister: Fixed issue with reports that occurred when selecting "limit to context".  |

# Omega 365 Release Notes

| UID        | Feature/Module                  | Description   |
|------------|---------------------------------|---|
| WFL-179324 | Status Reporting                | Status-workflows-per-month chart now supports excluding last month by using ExcludeLastMonth=1 in the url parameters.   |
| WFL-181523 | Status Reporting                | New chart element created to show active users count on local (on premises) environment. Should only be used on local environments.   |
| WFL-179804 | Status Reporting                | new chart element have been added to display Closed Bugs and Features stacked for last 12 months  |
